

# itinhaler®

100%  
made of silicone  
Asthma Spacer

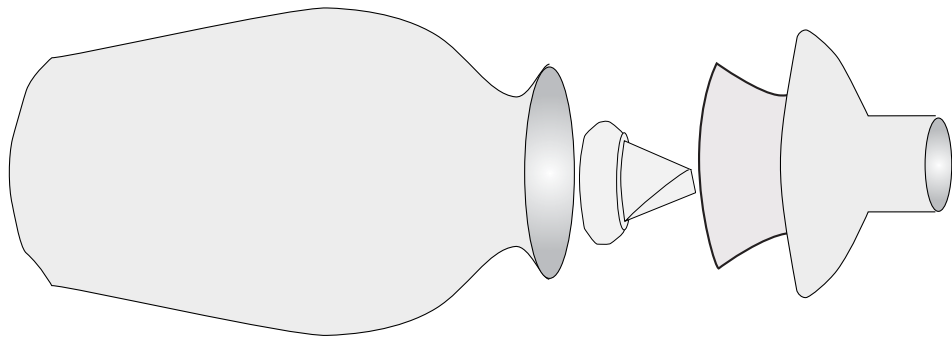

Thanks to its mineral composition,  
Itinhaler® is :

- Very efficient
- Very convenient
- Pure and safe
- Unbreakable
- Sterilizable

*Itinhaler® is a new asthma spacer specially designed by Protec'Som to improve usability and compliance. Made of 100% medical silicones, Itinhaler® is efficient, flexible, easy to carry, unbreakable, totally safe, reusable and fits all commonly used puffers.*

## Efficient

Made of 100% medical silicones, Itinhaler® is a wide volume spacer (325 cc). Combined with its optimal shape, minimal electrostatic and the smooth silicone surface, Itinhaler® ensures reliably metered dosing.

## Convenient : flexible it can be folded and fits all puffers

Itinhaler® is flexible, so, being a wide volume spacer when used, it is very small and is very easy to carry when folded. It can be carried in a pouch, a bag, a schoolbag etc... Due to its flexible connecting ring, Itinhaler® can be used with all commonly used metered dose inhalers.

## Very safe

The high quality level of the silicones used is the same as for implantable devices as cardiac valves or breast implants. Itinhaler is totally bio-compatible, not allergenic and chemically very stable.

## Unbreakable

Silicone is flexible and very strong, so it cannot be broken and is very hard to tear up. It does not become dangerous when broken, as broken plastic or metal which may become dangerous for patients or caregivers.

## Reusable

Itinhaler® is autoclavable, it can be heated to 200° c in accordance with all standard protocols for hospital sterilization. Therefore, in hospitals, it can be used by many different patients.
